

LD-F100CXLB
Side single-spindle Large-torque
Large-spreading winding machine

Scope of application:

* Mainly for all types of coil winding (transformer, welding machine)

Product manual:

* This machine uses 1.5KW AC motor, with 1/15 geared motor, it achieves high torque winding.

* Special design of the spindle, hardened, and high-strength pneumatic tailstock, can withstand the thick wire or flat wire of large-scale products.

* Can be customized according to customer needs.

Technical Parameters:

Model No.	LD-F100CXLB
Wire size	0.8-10.0mm (Customizable)
Speed	100rpm
Main motor	AC 1.5 KW 1/15 geared motor
Winding With	400mm
Spreading With	400mm
Controller	Single-chip microcomputer (with positive and negative functions)
Air supply	4-7KG/CM2
Power supply	AC220V,50Hz
Weight	240kg
Dimensions L×W×H	1550 x 1000 x 1350mm
