

**LD-FFW01**

**Automatic Single -station outer-winding stator winding machine**

**Be applicable:**

Mainly for cooling fan, exhaust fan, DC brushless motor, toy motor, magneto and micro motor stator and other coil production.

**Product Description:**

This machine adopts 3-axis motor control equipment, and cooperates with the main shaft AC frequency conversion motor and double stepping motor to automatically complete the functions of winding/spreading/rotating poles...etc. The winding speed is adjustable, the wires are arranged neatly, and the positioning is accurate.

Main motor	750W AC Mptor
Spreading motor	stepper motor
Pole changing motor	Stepper motor + reducer
Max speed	700rpm
Tension system	MTC permanent magnet tensioner
Wire size	0.5~2.0mm
Power supply	AC 220V 50HZ
Air source	0.4~0.7MPa
Dimensions	L1350*W500*H1100
Net Weight	145kgs
