

## LD-S101H

### Temperature controlled tin furnace

#### Characteristic:

1. Titanium alloy tin furnace.
2. The electric heating tube is easy to replace.
3. The thermostat can precisely control the temperature.

#### Specification:

Tin furnace effective size:	L60*W60*H35 mm (effective depth, the amount of tin stored inside the electric heating tube)
Temperature:	Up to 600 degrees
Power Supply :	AC 220V 50/60Hz
Net Weight :	4Kgs
Dimensions :	L400*W150*H150mm

\* The size of the tin furnace can be customized according to customer requirements.
