

LD-S101K
Temperature controlled tin furnace

Characteristic:

1. Titanium alloy tin furnace.
2. The electric heating tube is easy to replace.
3. The thermostat can precisely control the temperature.

Specification:

Tin furnace effective size: L300*W100*H35 mm
(effective depth, the amount of tin stored inside the electric heating tube)
Temperature: Up to 600 degrees
Power Supply : AC 220V 50/60Hz
Net Weight : 6Kgs
Dimensions : L600*W150*H150mm

* The size of the tin furnace can be customized according to customer requirements.
