

LD-LAE201
Automatic loading withstand-voltage testing and plating all-in-one machine

Machine station diagram:

Operation process:

Vibration plate loading>Withstand voltage test/Comprehensive test> Double plating

Equipment Specifications:

Loading/unloading method	Automatic loading and unloading plating
Test instrument	Customer-supplied (equipment provides standard connectors)
Applicable Bobbin Type	EI、EE、EF、EPC、ER、RM、PQ、UU
Size range	10~35mm(The corresponding fixture needs to be replaced when switching products)
Average production efficiency	1500pcs/hour.
Total power used	700W
Power supply	220V 50HZ
Gas source	0.6~0.8Mpa
Machine size	L1800*W750*H1400mm
Machine weight	About 220KG

Applicability: Products of different sizes can share the machine by changing the fixture.
