

LD-LATE01
Automatic assembly, tapping, testing and plating all-in-one machine

Machine station diagram:

Operation process:

Adsorption assembly> Magnetic core tapping> Testing>Plating

Equipment Specifications:

Loading/unloading method	Automatic assembly loading and unloading plating
Test instrument	Customer-supplied (equipment provides standard connectors)
Applicable Bobbin Type	EI、EE、EF、EPC、ER、RM、PQ
Size range	10~30mm(special machine)
Average production efficiency	1500~1800pcs/hour.
Total power used	1000W
Power supply	220V 50HZ
Gas source	0.6~0.8Mpa
Machine size	L2000*W800*H1400mm
Machine weight	About 350KG

Applicability: Products of different sizes can share the machine by changing the fixture.
